

From Paper to Digital: VLE Therapeutic's Digital Transformation Journey with Dot Compliance

The Challenge

Before implementing the Dot Compliance electronic quality management system (eQMS), VLE Therapeutics relied on a paper-based QMS that proved to be time-consuming and prone to human error. VLE Therapeutics determined the need for a solution that would digitize core processes, including document management, training management, deviation management and corrective and preventive actions (CAPAs). It found these capabilities in Dot Compliance.

The Solution

To address its top challenges, VLE Therapeutics implemented Dot Compliance's eQMS solution in two phases. First, the VLE Therapeutics team adopted the document management and training modules to transition from paper to an electronic system. This enabled the company to manage documents electronically and with digital signatures, track document versions, automate training management and track employee training records. In the second phase, VLE Therapeutics implemented CAPA and Deviations, further automating and streamlining their quality processes. This resulted in improved efficiency, enhanced control, and data-driven decision-making. Automated workflows for deviations and CAPAs reduced manual effort and improved tracking capabilities. The eQMS provided a central platform for managing all quality processes, fostering greater control and visibility. Built-in dashboards allowed VLE Therapeutics to access key metrics and make informed decisions.

About

VLE's mission along with its process development partner APC, is to accelerate the development and delivery of life-changing medicines for patients

“Dot Compliance has resulted in improved efficiency, giving us greater control, and has enabled the VLE Therapeutics team to make data-driven decisions.”

Carolyn Keeley, QA Specialist
VLE Therapeutics

The Benefits

VLE Therapeutics experienced significant benefits after implementing Dot Compliance's eQMS. The system streamlined workflows, reduced manual tasks, and provided insights to key metrics and data, allowing the quality team to focus on more strategic activities. The eQMS also facilitated the development and management of training programs, ensuring employees were adequately trained and compliant. The system's user-friendly interface and intuitive design encouraged employee adoption, leading to greater utilization. By centralizing document management, training, deviations, and CAPAs, the eQMS improved collaboration and reduced the risk of errors. This helped VLE Therapeutics make informed decisions. Overall, the implementation of Dot Compliance's eQMS significantly improved VLE Therapeutics's quality management processes and helped them achieve their goals.

Dot Compliance offers the industry's first ready to use Quality Management Solution powered by the Salesforce.com platform. The Dot Compliance solution suite includes an extensive set of off-the-shelf ready eQMS and compliance pre-configured processes, that enable customers to deploy quickly and cost effectively. Trusted by hundreds of companies worldwide, Dot Compliance is driving Quality 4.0 innovation.
