

Scientia Clinical Research Digitizes Quality Processes with Dot Compliance Ready to Use eQMS

The Challenge

The company's quality systems, including procedure, training, and policies, were paper based. Scientia wanted to eliminate this time consuming and error prone manual process.

The Solution

Scientia was looking for a cloud based solution that would cover all quality and compliance requirements. It was also critical to choose a solution that was user friendly, quick to deploy, affordable and intuitive as well.

They successfully deployed Dot Compliance ready to use eQMS to digitize training and deviations within a few weeks.

About

Scientia Clinical Research is world-class state of the art clinical trials facility with a focus on first-in-human and first-in patient studies as well as the ability to facilitate later phase trials in oncology, haematology, healthy volunteers and across other therapeutic disciplines.

Knowing that Dot Compliance is fully implemented in the facilities helps me as the director of Quality because I can monitor everything from my home office if I have need to...Life is so much easier without paper and now I can easily report to the CEO and key stakeholders."

- Franziska Loehrer, Director of Quality & Deputy CEO
